Chapitre I

Choose your project

- Your project can be about anything.
- You must write specifications on everything regarding your project, including but not limited to a presentation of the project, its stack, features, etc..
- Your specifications must cover 7 months of part-time work.
- It must be balanced (not too much stuff to do, but not too little either).
- During the realization, try and stay as close as possible to the specifications you gave at the beginning. Evaluation is done not only on the result itself, but also on group cohesion, work repartition, and the expectations.
